

# All-in-One Package

**RUNNING YOUR BUSINESS HAS NEVER BEEN EASIER**

## One Stop Solution for running your accommodation

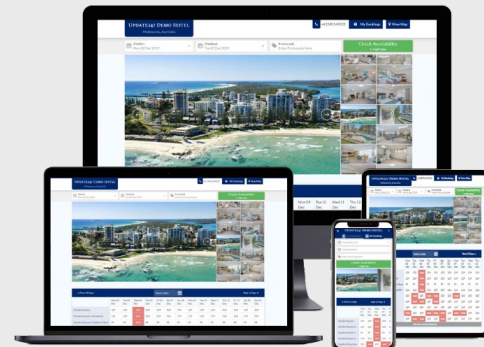

Suitable for Bed & Breakfasts, Guesthouses and Small Hotels and accommodation of all sizes. Becoming an accommodation provider has never been easier with our all-in-one-package to make starting or running your business a breeze.

### All-In-One Package Includes:

#### **Booking Button** (Commission-free bookings)

Commission-free instant booking button can be installed on your website to receive direct bookings 24/7, whilst you can enjoy dinner with friends and continue to receive bookings without fumbling on the phone and looking through your booking schedule.

#### **Channel Manager** (Unlimited channels and rooms)

Update247 Channel Manager auto-synchronise updates for room availability & rates to your website and various Online Travel Agents (OTAs), Global Distribution System (GDS) and Vacation Rental websites that your accommodation is listed. No software nor hardware installation required. Access the channel manager online from anywhere in the world and at any time of the day.

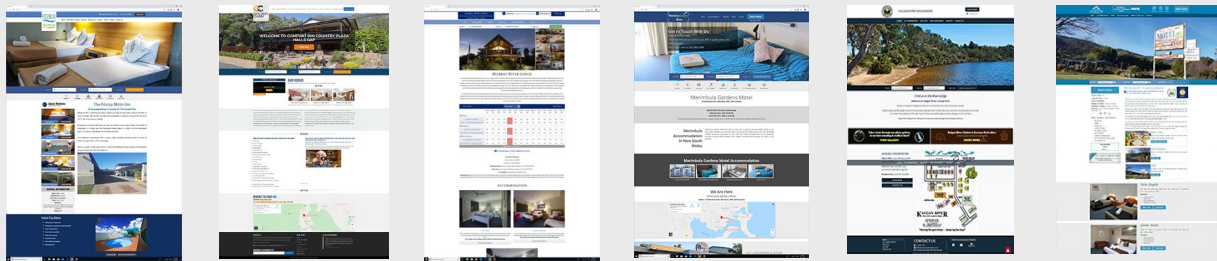

**Custom-built Website** for your Accommodation  
(Responsive, Modern Design, Mobile-friendly)

Your accommodation website is the first place that your guests find information on your accommodation creates an important first impression. A modern and responsive website reflects on your image, regardless of whether you are just a small bed and breakfast or a serviced apartment or hotel, if your guests like what they look they are more likely to book their stay with you.

**SAMPLE SITES:**

**Website Hosting**

We will host your website as part of the All-In-One Package saving you hundreds of dollars each year.

**Email Hosting**

We will host your email, saving you the hassle of going to different providers and trying to coordinate and manage them yourself.

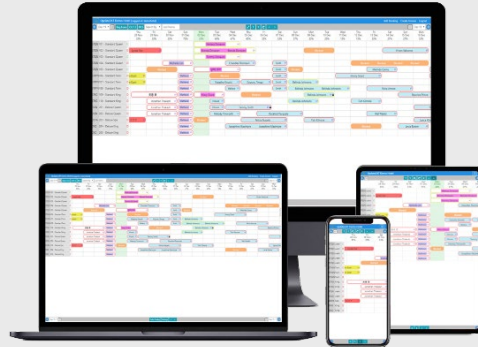

## Property Reservation System

Works as hotel's front desk system and manages operational tasks like:

Allocate booking to a room(s); Add walk-ins or phone bookings; Block rooms for maintenance or housekeeping;

Update/Schedule/ manage payments; Send invoices/ receipts/welcome email to guests along with check-in instructions or directions to your property; SMS features available;

Send check-out list to housekeeping so they know which room unit number needs cleaning etc. Our simple drag-and-drop feature easily moves a booking to different room or reduce/extend a booking. Generate reports for End of Day, Trading, Accounting and Banking. Seamless scrolling to view bookings across dates without having to wait for it to load. With so many features for just a small monthly fee, you can spend more time on making your guests feel welcome.

## Payment Gateway Integration

Setup auto payment gateway on our systems to charge the guest automatically for deposit and/or balance and process payments easily. You won't have to worry about forgetting to take payments as the system will auto debit from the guest's credit card provided at time of booking according to your settings: full payment upfront or a deposit or full payment on checkout. You can also enter credit card details for bookings taken over the phone or walk-ins into update247.

## SSL Certificate for your Website

### Is your hotel website HTTPS ready?

Google has credit card autofill feature which is too powerful to be used over non-secure HTTP websites. None-HTTPS Hotel websites run the risk of losing the trust of potential guests who do not want to give out their personal and payment details to make a booking over unsecured websites.

### What does HTTPS ready mean?

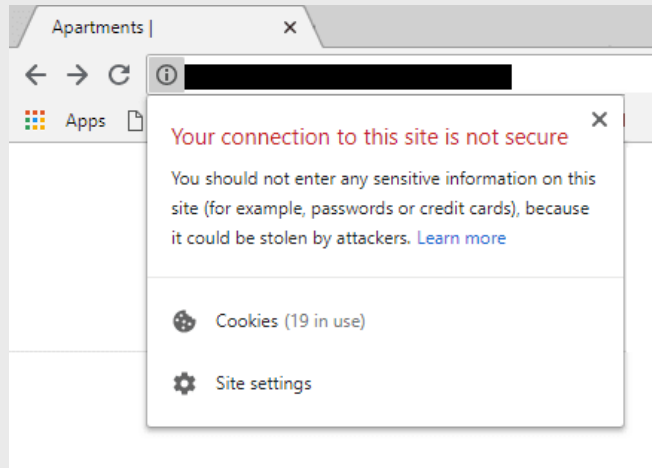

*Hypertext Transfer Protocol (HTTP) + Secure Sockets Layer (SSL) – Hypertext Transfer Protocol (HTTPS) = Secure, safe Internet transactions.*

Check the address bar of your browser, it should have the lock icon with addition of "https" at the front of the URL which indicates you are in a secure session.

 Secure | <https://www.update247.com.au>

### Is Your Hotel Website Non-Secure?

Non-Secure Website (see screenshot below):

If you see the current warning below it is asking visitors not to enter credit card information as information can be stolen by attackers. In Chrome, Google displays the warning when you click on the 'i' icon in the address bar and may display explicit warnings to visitors on the page. This is damaging to your business when your potential guests go elsewhere to make their bookings. Don't delay and get your website HTTPS ready now.

### What are the benefits of being HTTPS ready?

HTTPS ready websites benefits Google site conversions. Chrome now marks HTTP pages as "Not secure" if they have password or credit card fields. Guests will not want to provide personal and credit card details to unsecured websites and if your website is HTTPS ready, they will rather book with you instead. Hence, generating more revenues for your business. Create a safe environment where your guests can trust your website and make direct instant bookings with you (**Commission-Free**).

**Monthly (AUD) : \$99 plus GST**

(No Lock-in Contract. New Signups only. Request a quote for more than 10 rooms/units.)
